

Vapour Shield 46K

easy-trim VapourShield

Description

VS46k is a five layer vapour and air control layer produced from 3 layers of virgin polyethylene, with a PET multi-filament reinforcing grid that gives exceptional strength, plus a 15 micron thick aluminium foil.

Typical specification

Vapour Control Layer VS46K by Easy-Trim Roofing & Construction Products Ltd is to be installed in accordance with the manufacturer's instructions and the requirements of BS 5250 Code of Practice for control of condensation in buildings.

Installation

- VS46K should always be laid on the warm side of the insulation.
- All joints in the vapour control layer must be overlapping by a minimum of 150mm and sealed with a double layer of VapourSeal tape.
- Damages that occur to the vapour control layer during installation should be repaired using a patch of membrane fixed with VapourSeal tape.
- Any penetration or edges to the vapour control layer should also be sealed with VapourSeal.

NOTE: This information is given in good faith being based on the latest knowledge available to Easy-Trim Roofing & Construction Ltd. Whilst every effort has been made to ensure that the contents of the publication are current while going to press, customers are advised that products, techniques and codes of practice are under constant review and liable to change without notice. Responsibility cannot be accepted for the application of products, and no claims can be considered, where the manufacturer's instructions have not been followed. The user should not assume; based on any information provided in this sheet, that the product is suitable for any abnormal use. All products are sold subject to our standard conditions of sale, available on request.

Performance & Properties

Size:	2m x 25m & 2m x 50m
Colour:	Green/Grey/Silver
Thickness:	0.6mm
Roll weight:	17.5kg & 35kg
Water vapour transmission:	0.005g/m ² /day ⁻¹
Water vapour resistance:	>46,000MNsg ⁻¹
Thermal behaviour:	Stable between -40°C and +80°C
Tensile strength:	7.5KN/m
